FOR IMMEDIATE RELEASE

Masstech Group Announces Compatibility With Ciprico's DiMeda 10Gb Ethernet NAS

Masstech Group Lets Broadcast Facilities Run Smarter and Now FASTER Than Ever

LAS VEGAS, NEVADA — April 24th 2006 — Masstech Group Inc., a world leader in solutions for media lifecycle management, today announced the compatibility of the company's flagship product, MassStore*, with Ciprico's DiMeda 10Gb Ethernet NAS solution.

"Masstech is one the leading technology companies in the broadcast industry today. The combination of Masstech's media management solutions with the DiMedia NAS will allow broadcasters to move more data faster and deliver a great step forward," says James Hansen, Chairman and CEO of Ciprico. "As the need for asset management within the broadcast arena grows, we are pleased to have such a strong industry partner with a strong customer base and are committed to forging a long term and mutually beneficial relationship."

Ciprico DiMeda NAS solutions have been widely deployed for a variety of content creation and delivery applications, including major broadcast newsroom production and automation, regional broadcaster production and play-to -air, and cable network delivery including Video on Demand. With Ethernet becoming the pervasive infrastructure in these environments for multi-stream

sharing and delivery of formats such as DV25/50 and MPEG-2, 10Gb Ethernet components have now become financially attractive. The DiMeda 10G presents users with a simple, plug-and-play, high performance alternative to SAN-based systems, extending these capabilities into areas employing compressed HD formats such as HDV in broadcast and JPEG 2000 in digital cinema.

“Massstore is the premier product in content life cycle management for the digital media space and the DiMeda NAS from Cirprico extends the bandwidth for clients wanting a NAS connectivity environment” commented Sudy Shen President and CEO of Masstech Group. “The DiMeda with 10G will provide high bandwidth thrupt and offers a level of scalability and robustness that Massstore's powerful distributed, redundant, adaptive and clustering architecture (DRAC*) can utilize fully

MassStore is a powerful solution for broadcast content management is available from Masstech Group Inc., a leader in solutions for media lifecycle management. Masstech’s MassStore™ provides broadcasters with an end-to-end advanced nearline and archive management solution. MassStore™ is an essential part of the overall asset management model integrating thousands of hours of nonlinear digital media storage with a direct interface to a facilities automation system video servers as well as integration with master control, traffic and scheduling systems master control to complete the entire asset . MassStore allows broadcasters full content management and tracking of all video assets as well as the ability to generate low-resolution “proxy” versions of MPEG-2 files for content management and preparation from anywhere within the entire network.

“The broadcast industry is continuing its trend of investing in infrastructure which improves productivity and efficiency” commented Sudy Shen President and CEO of Masstech Group. “Low cost facility redundancy is an area which is inline with this trend. In addition many of our clients are realizing immediate returns in the form of reduced business continuance insurance.”

MassStore by Masstech as well as the Ciprico DiMeda 10Gb NAS will be on display during the NAB2006 exhibition in the company’s booth, SU1642, at the Las Vegas Convention Center.

About Ciprico Ciprico designs products and provides system solutions for digital media workflows. Ciprico is headquartered in Minneapolis, Minnesota, with sales and reseller offices in the United States, Europe, Japan, and China. More information about Ciprico is available at www.ciprico.com.

About Masstech Group

Masstech Group Inc. is a developer of software and embedded hardware solutions to enable management, conversion, distribution, and sharing of digital content across open IT storage/server platforms and networking infrastructures. The company's offerings in Media Lifecycle Management, Workflow Productivity Enhancement, Business Continuity & Compliance provide customers with value enabling solutions developed through a combination of visionary products and engineering leadership. The company's products are available from a direct sales force and global channel partners. For more information on Masstech Group and products, please visit www.masstechgroup.com.
